

# WHMCS DNS Provider

Welcome to WHMCS DNS Provider Module

## DNS Provider Module

### What can WHMCS DNS Provider Module do?

WHMCS DNS Provider will transform your WHMCS into a system capable of selling DNS Hosting similar to companies such as DNSMadeEasy, EasyDNS, ClouDNS, etc. With the module you will also be able provide value-add service to your customers such as the ability to create **Web Redirection, Email Forwarding, Email Catch-all, Dynamic DNS (DDNS)** for the hosted DNS..

Your client can host any 3rd party domain that isn't registered with your WHMCS.
