Installation Guide

This document outline the basic installation, configuration and the basic usage of the WHMCS Video PayWall Module

Installation

Upload all the files in the modules folder to your WHMCS /modules/addons and modules/servers directory.
Language Uploads

The module includes English as the base language. If you wish to translate it to your enabled language in WHMCS. Make a copy of the english.php in /modules/addons/dnssuite/lang/ to your associated language. For example, french.php. The filename must match to the ones in the WHMCS/lang/french.php

Configuration

Module Activation

Log into your WHMCS admin backend and enable the module by going to **Setup Addon Modules WHM CS Streaming PayWall Activate**

» WHMCS Streaming PayWall Restrict your video content	1.0	CodeBox.ca	Activate	Deactivate	Configure

Once activated, click on **Configure** and fill in the license key and make any settings adjustment.
